Short Description

We have email marketing software to assist you in reaching out to your potential clients within short time span.

Description

We have email marketing software to assist you in reaching out to your potential clients within short time span. Most of us who have an email account but not many of us know that there are a lot of limitations with our email account.

Firstly, there is a maximum number of emails we can send out. In some cases, this limitation can be the maximum numbers of emails we can send per hour or per day. There are service providers who will limit number of emails you can send per month. If your database is large and you intend to use MailChimp or something similar web services, the cost will be high. At the same time, if you are using database that you buy from vendors, very unlikely you can send emails to the email database. Offshore CorpServe Pte Ltd is able to send out large quantity of emails for you and we are able to assist you to target the right places.

We charge US\$1000 for setting up the relevant accounts for you to send emails to the database. At the same time, you may tell us who are your targeted audiences and we will help you to identify the email addresses that you need. The client has to be responsible for the content of the marketing material.

Do send us an email at sales@offshorecorpserve.com and discuss with us your specifications.
